MARKET RESEMBLES A STAGNANT POOL

financial News, Whether Good ar Bad, Is Virtually Without Any Marked Effect.

OTICEABLE DECREASE IN THE VALUE OF EXPORTS

lenty of Money Available for Therefore the transfer of Money Available for Therefore the evestment, but the Investors Manifest Caution.

NEW YORK, April 15.—Anything of intest in the financial world today was and outside the stock market. That as like a stagnant pool, the slight stirings on the surface of which were easily negligible. Some of the day's developments were not unimportant, but they ad no reflection in the stock market he statement of the country's foreign rade for March made a remarkable howing. The point most discussed was he falling off in value of exports as compared with March of last year, the gricultural exports being expanded in he total exports being expanded in he total exports to over \$20,000,000. Falling off in cotton exports accounts for more than \$8,000,000 of this decrease and he comparison is with a month of exportance attaches, nevertheless, to the fact that exports have fallen below those of ast year for several years. Significance attaches, nevertheless, to the fact that exports have fallen below those of ast year for the first time since last October, when the financial crisis forced he marketing abroad of our commodities.

Of the \$100,000,000 of gold which came.

the marketing abroad of our commodities.

Of the \$100,000,000 of gold which came in at that time there has been, until the engagement of a million dollars to-day for export, no reflex abroad. The decline in merchandise exports of \$20.000,000 for March compares, in fact, with a shrinkage in imports in the same comparison of nearly \$44,000,000. Here is much more significant evidence of the effects of commercial depression than in the export items. It helps to explain the lack of cheerfulness in markets abroad, as well as here, and also the languid interest in the international gold movement. Interior banks continue to ship surrency to New York on a very large scale, bank notes figuring largely in these shipments. Owing largely to the redemplons of the sub-treasury, the banks have lained from that institution in the presunt week \$4,938,000.

ons of the sub-treasury, the banks have lined from that institution in the presult week \$4,93,000.

Several large dividend disbursements are made today, and the plethoric contion of the money market was rather creased. Much disappointment was it over the report of another increase the number of idle freight cars made the committee on ear efficiency of the nerican Railway association. Compared the March 18, the date of the previous port, idle freight cars had increased April 1, 2465. Since the maximum is reached on February 5, there have an successive decreases in the surplus cars for each of the fortnightly perisonal cars in the latest period gives fed credence to reports of some rese in trade activity from the previous overs. Weather news from the sechange in a market today and a fall in the steril are desired, is scanned with attentations are desired, is scanned with attentation and the whiter wheat belt, in which its are desired, is scanned with attentations are the line of profil on gold exists of the line of profil on gold exists manifested a languid interest in matter and offered no inducement hanten the movement. The stock tket was little affected by this, as any other influences.

Onds were irregular. Total sales, parise, \$2,184,000.

FIRMER WHEAT MARKET MARKETS IS LIGHT DUE TO DRY WEATHER

Slight Advance in Tin Abroad; Fair Demand for Various Small Primary Receipts and Stronger Demand for Cash Delivery Help Bulls.

> CHICAGO. April 15.—The wheat market was firm all day because of the continued drought in Kansas and Nebraska and the absence of any forecast of precipitation for that section Factors of minor importance were firm cables, small primary receipts, and a brisk demand for cash wheat at Minneapolis. Trade became very quiet late in the day because of light demand. The close was firm. May opened \$\tilde{a}\$ ic higher at \$20\$\tilde{a}\$ points advanced to \$22\$\tilde{a}\$ \$22\$\tilde{a}\$ c, and closed firm at \$21\$\tilde{a}\$ \$21\$\tilde{a}\$. Owing to Wednesday being Arbor day, there was but very little doing on mar-ket row. Nothing new was seen on the stands and the prices of the various edistands and the prices of the various edibles remained unchanged. Few customers appeared and those who did only made small purchases.
>
> The largest demand was for fruit, especially oranges, bananas, appies, lemons, strawberries and grapes which were offered, respectively, at 36 and 25 cents a dozen, 15 cents a box, and 30 cents a pound.
>
> A new sulpment of fresh vegetables from the Golden State arrived Wednesday afternoon and will be placed on the stands some time today. This is the second shipment to arrive this week, and it is expected that before next Saturday still another will put in an appearance

vanced to 224@324c, and closed firm at 214@312c.

The corn market was dull and steady, the range in prices for all deliveries being about half a cent. Acceptances from the country were light and the movement was small. Commission houses were the chief bidders and offerings came mainly from holders. The close was steady. May opened unchanged at 57c, sold between 662c and 672c, and closed at 674c.

sold between 65% and 57%, and closed at 57%.

Onts were firm all day because of absence of rain in the Southwest. The principal trading was in September option. May opened unchanged at 53%, advanced to 53%, and closed at 58%.

Provisions were weak all day because of increased receipts of live hogs here and at other Western packing centers. May pork was 7% lower. Lard was 50 down, and ribs were 20c lower.

PANCE OF THE LEADING FUTURES. CHICAGO April 15.—Cattle—Receipts about 13,000; market steady to a shade lower. Beeves, \$4,50@7.20; cows and heffers. \$125@6.20 Texans. \$4,50@5.40. calves. \$4,50@6.00; westerns, \$4,50@5.50; stockers and feeders, \$3,25@5.25.

GOLDFIELD CON. IS BETTER WITH DEPTH 3

Hayden Stone and Company Predicts Great Future for the Property.

The developments of recent period tend to further strengthen our opinion of the Goldfield Consolidated, the shares of which have recently shown considerable activity at advancing prices. Touching upon the affairs of the company, we are in receipt of the following from official sources, says Hayden Stone & Co.:

"The winze, being carried down from the 450 foot level of the Mohawk, is now bottomed at a depth of 155 feet, with no change in the character of the values. We shipped 400 tons of ore, which was extracted in the sinking of this winze, and the results show an average recovery of \$234 per ton. When you consider that not a pound of waste or low-grade was sorted out of this material, it is really astonishing. The crosscut to undercut the winze on the 600-foot level is now in about 210 feet, and we still have to push forward an additional 160 feet before reaching the vein. We should do this easily within three weeks, though the character of the ground renders it nec-essary to timber up closely."

essary to timber up closely.

The above was written at Goldfield under date of April 1, so that within two weeks we may look for what is in many respects the most important development since the inception of min ing in the Goldfield district, as should the completion of the crosscat prove the continuance of the gold values to its depth, it is conservatively estimated that an amount equal to not less than \$3 per share on the company's entire share capitalization will have been add-ed to the established value of the prop-

claims are being developed preparatory to their operation on a broad seale, which will be entered upon about six months hence, when the new 600-ton months hence, when the new 600-ton mill will go into commission, and when the company is confidently expected to show not earnings of \$2 per share. While the Goldfield Consolidated has already a wonderful mine, with net values of close to \$40,000,000 actually in sight, it is well to bear in mind that as yet not more than one-twentieth of its mineral acreage has been developed. These shares are extensively traded in on the New York curb and in San Francisco. Their present cost is more than assured by the net values is more than assured by the net value blocked out, while the recent develop-ments go a long way toward justifying the opinion that they will double in value within a year, in consequence of which we strongly advise their pur-

LATE REPORT OF UTAH CON. 18 ANALYZED

The annual report of Utah Consolidated was distinctly unfavorable, but it would have been surprising had it been otherwise. It was only in line with the very disappointing reports of other companies, and we see absolutely no reason why it should have occasioned the selling which followed the appearance of the report, says the Boston Commercial Bulletin.

The output of refined copper for the year was only 13,387,551 pounds, a decrease of 4,546,422 pounds; of silver, 390,-296 ounces, a decrease of 67,516 ounces, and of gold, 24,554 ounces, a decrease of 8947 ounces. The amount of ore treated was also somewhat smaller—279,842 tons, as compared with 295,989 tons in 1906—owing to the cessation of preduction that was caused by the smelter troubles.

Net profits for the year were only \$1,-179,442, or considerable less than half the net profits of \$2,835,008 in 1906, and \$200,000 smaller than those for 1905. That is, the company carned only \$3,23 per share less year, as compared with \$9,45 in 1906, and as dividends,of \$4,50 per share were paid from the year's operations the company's profit and loss surplus had to provide the balance. The total reduction in surplus, indeed, was no less than \$220,-588, that item standing at \$1,530,640 on December 31 last.

This poor showing was due to two causes. In the first place, it appears that the company received a fraction less than 16 cents per pound for its metal. In the second place, costs, which were only about 4.2 cents per pound in 1906, were in the neighborhood of 7,6 cents last year. This, in turn, was partially due to the fact that the copper contents of the ore fell off from \$2.4 pounds per ton in 1906 to 50 pounds in 1907, and also to a small reduction in the yield of preclous metals. The most discouraging feature of the report is, of course, the decrease in copper contents of ore itst mentioned. The meet encouraging feature is the statement that the sulphide ore reserves have been increased from 1,100,000 tons to 1,203,050 tons. disappointing reports of other companies and we see absolutely no reason why it

The Doctors Who Cure

CATARRH—Deafness, Asthma, Lung Troubles, Rheumatism, Hay Fover, Epi-lepsy, Hysteria, Insomnia, Heart Trou-bies, Diseases of the Stomach, Kidneys, Liver, Bowels and Eiadder, and all Cura-ble Nervous, Chronic and Private Dis-eases of both sexes.
